NAVEED ASLAM

Software Engineer | Full-Stack Developer | Data Analyst

Multan, Pakistan • +92 329 6136483 • [Add Email] • linkedin.com/in/naveed-aslam-dev • [Add Portfolio URL]

PROFESSIONAL SUMMARY

Software engineer, full-stack developer, and data analyst with experience across the entire product lifecycle — from architecture and development to deployment and analytics. Skilled at building scalable web applications, backend systems, and business-intelligence dashboards that turn data into decisions. Comfortable owning products end to end using modern JavaScript frameworks, relational databases, cloud platforms, and reporting tools.

TECHNICAL SKILLS

Languages & Frameworks: React, Next.js, TypeScript, JavaScript, Node.js, Tailwind CSS

Data & Business Intelligence: Power BI, DAX, Data Modeling, Excel, VBA, Python

Backend & Database: PostgreSQL, Prisma ORM, REST APIs, JWT Authentication, Database Design

Platforms & Tools: Git, Supabase, Azure, WordPress

Core Competencies: Full-Stack Development, API Development, Data Analysis, Dashboard & BI Development, System Architecture, Product Development

PROFESSIONAL EXPERIENCE

Software Engineer / Full-Stack Developer — **iSkillSpot** *[Add Dates]*

- Built and scaled **TetraMagnet**, a multi-tenant email-outreach SaaS platform (Next.js, Prisma, PostgreSQL), owning architecture through deployment.
- Engineered dual email-delivery providers (Brevo and Resend) to improve reliability and deliverability with automatic failover.
- Automated scheduled email campaigns using Node Cron background jobs, removing manual send work.
- Designed workspace-scoped, multi-tenant architecture that isolates customer data, secured with JWT authentication and authorization.
- Developed and optimized REST APIs and PostgreSQL queries for performance, and collaborated on product architecture from concept to release.

PROJECTS

TetraMagnet — Email Outreach SaaS *Next.js, Prisma, PostgreSQL, Node.js*

- Developed a multi-tenant outreach platform with campaign scheduling, automation, and workspace isolation.
- Implemented dual email providers for redundancy and a secure JWT-based authentication system.

Retail Sales & Shipments Dashboard *Power BI, DAX*

- Built a multi-page BI dashboard covering executive overview, sales performance, and shipment & delivery analytics.
- Created reusable DAX measures and a shared semantic model, delivering actionable insight through interactive visuals.

NewRevert Academy Website *WordPress, HTML, CSS*

- Converted a static design into a fully content-managed WordPress theme, handed off for non-technical staff to run.
- Delivered a production-ready, maintainable site optimized for usability.

EDUCATION

BS Data Science — MNS University of Agriculture, Multan *2024 – 2028 | CGPA 3.5 / 4.00*
